Since being elected 12 years ago, and with the opening of the Fish Creek Lacombe LRT Station, I have been committed to us developing a comprehensive area plan for this area. After receiving Council's endorsement, I along with city staff hosted a week long planning session with the community last June. I want to sincerely thank all the residents who came out and took part, and in particular, I want to thank Mr. Tony Cleveland, Chair of LUMAC (Land Use Mobility Advisory Council).

Building on this work, and in further consultation with the Ward 13 President's Council, I will be hosting a Town Hall Meeting on Wednesday, February the 22nd at St. Mary's University from 6:00 to 8:00 PM. This open house is the next step in finalizing this plan before taking it forward to Council.

This will be an important Town Hall meeting which will address the of connectivity the LRT system, local services, land use types, scale, transportation/mobility, and any other issues as they relate to the potential of any future development in the area. Through the feedback gained from this Town Hall meeting we will move forward with plans for the station area and the funding needed to implement this plan.

Thank you and I look forward to seeing everyone on the 22nd.

Alderman Diane
